Product codes can be found in product data sheet tables. The codes provide some basic information about the product while a partially filled configuration code contains complementary information about the detailed specifications. When placing an order, product codes should include the fully completed configuration part. The configuration code part should be placed after the main product code. The main product code and configuration part will appear as shown in the example below:

The construction of a water and dual fuel radiator product and configuration code:

WGALE054030

K916SX

PRODUCT CODE  
(located in the table for the product)

CONFIGURATION CODE  
(supplemented by hand)

Configuration

K 916 SX

Package code   Colour code   Connection code  
*K – carton box*

Construction of electric heater configuration code

WLALE054030

K916E1DRYM

PRODUCT CODE  
(located in the table for the product)

CONFIGURATION CODE  
(supplemented by hand)

Configuration

K 916 E1 DRY M

Package code   Colour code   Connection code   Heating element code   Type of heating element cable code  
*K – carton box*

Zinc powder primer

**C** – Code of zinc powder primer is an extra processes

WLALE054030 K916SX **C** – Extra processes or additions code

## Legend

Available in chrome finish.

Radiator available in a "water" version.

Radiator suitable for dual fuel connection. Electric heating element can be installed.

Radiator available in electric only version. It comes prefilled with a 'heating medium' and equipped with a heating element. All tested and ready to use.

Connection types dedicated for this radiator.  
The icon shows the flow and return connections for the radiator as well as the thermostat valve and heating element position if applicable.

Optional connections available for this radiator.

Suggested heating element power output for electric and dual fuel versions.

Weight.

Capacity.
